Problem Solving

PERSONAL PROJECTS

Online Parking Reservation

- Developed an online parking reservation system to streamline the process of booking parking spaces in commercial complexes. The goal was to provide users with a convenient and efficient way to reserve parking spots in advance, reducing the hassle and time wasted searching for parking
- Technologies Used: HTML, CSS, JavaScript, Python, Django framework, PostgreSQL, Stripe payment gateway integration
- Implemented a user-friendly interface allowing users to search for parking spaces based on location, date, and time
- Developed a real-time availability tracking system to ensure accurate reservation status updates

Student Chat Bot

- A Student bot project is built using artificial algorithms that analyzes user's queries and understand user's message. This System is a web application which provides answer to the query of the student
